Concomitant Medication Log (Adult)

Patient ID __ __ - __ ID __ - __ __ __

Instructions: record all **non-study prescription medications** taken from the time of the initial screening visit through the completion of the follow-up period or discontinuation from the study. For each medication, indicate whether the patient is taking the medication routinely (daily or according to a set schedule) or as needed.
The list of concomitant medications should be reviewed with the patient at every protocol visit and the log updated as necessary. Record medications that are started or stopped during the course of the study.
Do not record starts or stops due to a change in dose.

Medication	Taken Routinely	As Needed	Start Date (mm/dd/yyyy)	Stop Date (mm/dd/yyyy)	System ID
MED	TROUTN	ASNEED	STRTM/D/Y	STPM/D/Y	SYSID
