Introduction: Thank you for agreeing to participate in the BE-DRI study.

We will ask you to complete a survey like this one at several time points in the study. This survey is called the Follow-Up Patient Survey Parts I & II and is completed at all post-intervention study visits. Part I contains measures of your current quality of life and an assessment of your capabilities in the performance of routine physical daily living activities. Part II includes questions about costs in your daily life that are related to your problem of incontinence.

As with all of the information we collect for this research study, all of your responses are completely confidential. Your responses are never linked with your name and your name never appears on any of the research documents. Providing this information will not affect any of your services, benefits, or eligibility for coverage.

Part I of the survey should take about 15 minutes to complete. Ideally, you will be able to complete the entire survey in one sitting.

There are five (5) parts to the entire Follow-Up Patient Survey. Please read the instructions at the start of each section carefully before you begin each new section.

Please complete this questionnaire at your earliest convenience and return it to the Study Nurse as soon as possible.

Try to answer every item, but do not dwell too long on any one question. We want your answers, so please complete the questionnaire on your own. After you have completed the Survey, please check to make sure you have not missed any items. If you have any questions about any of these items, please call me:

Section E: Matters of Health: The Health Utilities Index (HUI)

Instructions: This next section contains questions which ask about various aspects of your health. When answering these questions please think about your health and your ability to do things on a day-to-day basis, during the past week. To define the past week period, please think about the date this time 7 days ago and recall the major events that you have experienced during this period. Please focus your answers on your overall abilities, disabilities and how you felt during the past week.

You may feel that some of these questions do not apply to you, but it is important that we ask the same questions of everyone. Also, a few questions are similar; please excuse the apparent overlap and answer each question independently.

Please read each question and consider your answers carefully. For each question, please select one answer that best describes your level of ability or disability during the past week. Please indicate the selected answer by circling the number beside the answer.

All information you provide is confidential. There are no right or wrong answers; what we want is your opinion about your abilities and feelings.

- E1. Which one of the following best describes your ability, during the past week, to see well enough to read ordinary newsprint?

Able to see well enough without glasses or contact lenses. 1

Able to see well enough with glasses or contact lenses 2

Section F: Matters of Money: Willingness to Pay

Please respond to these questions about how much money you would be willing to pay **out of your own pocket** for the treatments described. Assume that payments for these treatments are not covered by your health insurance or HMO, Medicare or Medicaid and that you must pay for them **out of your own pocket**.

F1. Imagine that a new treatment for incontinence becomes available that has no side effects. This new treatment reduces the number of times you leak urine **by one quarter (25%)**.
For example, if you currently *leak urine* 4 times a day, with this new treatment you would *leak urine* only 3 three times a day. Or if you *leak urine* every day, this would be reduced to 3 days out of 4.

What is the most money that you would be willing to pay per month **out of your own pocket** for this treatment? **(Check one box only)**

F6. Imagine that a new treatment becomes available that has no side effects. This new treatment reduces the number of times you need to urinate each day **by one half (50%)**.

For example, if you currently *go to the bathroom* 16 times per day, with this new treatment you would only have to *go to the bathroom* 8 times per day.

What is the most money that you would be willing to pay per month **out of your own pocket** for this treatment? **(Check one box only)**
