

Appendix B. Reimbursement

The TrialNet Clinics will be paid for their recruitment and follow-up of study participants. Current rates for reimbursement are posted in the TN20 reimbursement schedule located on the TrialNet website on the TN20 Immune Effects of Oral Insulin Protocol page under the “Working Documents” portlet in the “Reimbursement Schedule” folder. The University of South Florida TrialNet Coordinating Center will provide payments to the Clinical Centers and Affiliates for study tasks performed based on complete and accurate forms submitted online. All payments will be made in United States dollars. Reimbursement payments will be generated and mailed every other month from the TrialNet Coordinating Center. A payment report and a detailed listing of services reimbursed will be sent along with the check.

Reimbursements are made based on the site number listed in the online forms for that particular visit/event.

Please review the TN20 Reimbursement Overview for additional information regarding the reimbursement procedures, which can be found on the TrialNet website on the TN20 Immune Effects of Oral Insulin Protocol page under the “Working Documents” portlet in the “Reimbursement Schedule” folder.
