IBDGC Data Archive

The NIDDK Inflammatory Bowel Disease Genetics Consortium (IBDGC) Repository data release Archive contains: (1) descriptive documentation; (2) study forms; and (3) IBD datasets of phenotype data and pedigree file.

The files in the Archive are organized into the following three directories:

1. Documentation
2. Forms
3. Data

1. Documentation Directory
The Documentation directory contains five documents:

- Metadata.doc – Metadata for the IBDGC study
- phenotyping-manual.pdf – Manual used for the phenotyping study
- Publication_031708.doc – List of relevant publication as of March17, 2008
- README.txt – Description of the data release
- IBDGC_PhenotypeAnalysisIntegrityCheck_v1.0.pdf – A report describing the results of an analysis by repository statisticians and quality control specialists to ensure that the dataset distributed by the repository is a true copy of the study data.

2. Forms Directory
The Forms directory contains the forms used for data collection in the phenotyping study.

- phenotyping-forms.pdf - one file containing the three forms used in the phenotyping study

3. Data Directory
The Data directory contains two subdirectories: *Pedigree File* and *Phenotype data*.

The *Pedigree File* subdirectory contains the following two files:

 - pedfile.sas7bdat
 - pedfile-codebook.txt (codebook)

The *Phenotype data* subdirectory contains the following three files:

 - phenotypes.sas7bdat
 - phenotypes.sas (SAS command file to generate formats)
 - phenotypes-codebook.txt (codebook)
