

Immunology Cohort Data Collection and Result files

Short name	Long name	Additional information
IC	Immunology Criteria	Only required at sites participating in the Immunology Ancillary study. Refer to protocol for participating sites.

Dataset	Description
immuno_cohort_received	Log file of samples sent and received at the immunology lab for the cohort protocol.
immune_cohort_ds	Cumulative result file from the immunology lab
CD3hi	CD3hiCD4- T-cell analysis
Luminex	Luminex data for plasma levels of 28 cytokines/chemokines
Controls	Result file of controls from the immunology lab

Participant ID variables

ID

- ID assigned at current site. Needed due to participants transferring from one HBRN site to another.

ORIG_ID

- ID at first enrollment in HBRN – if participant moved to a new site during the Cohort Study, a new ID was assigned at that current site. Use ORIG_ID to link participants' data across HBRN datasets.
