

Nonalcoholic Fatty Liver Disease Adult Database 2 (NAFLD Adult Database 2) Study Data Archive

The Nonalcoholic Steatohepatitis Clinical Research Network (NASH CRN) was initiated in 2002 to conduct multicenter, collaborative studies on the etiology, contributing factors, natural history, complications, and treatment of NASH. The Nonalcoholic Fatty Liver Disease Adult Database 2 (NAFLD Adult Database 2) continued the longitudinal follow-up of participants enrolled in earlier NASH CRN studies and recruited new participants with recent liver biopsies.
