Hi Everyone,

A code of '11' (11=Counselling) has been added to Form 11, Question 5b for cases in which you see the patient face to face but nothing else is done: you don't change meds, you don't measure blood pressure. (Do not file a form 11 if you don't actually SEE the patient face to face; Form 11 is the VISIT form.)

This code should only be used when counselling the patient regarding the randomized medications or any other counselling visit that is not already on this form.

If you use the code of '11' for Q05b, then you are not required to enter any symptom information but you can if you get this information. In any case, you will need to press the 'Enter' key through each field of the form.

If you adjust the patient's randomized medications at the visit but don't measure blood pressure, you would use code '8' (8=Medication drop-off/pick-up) for Q05b. A Form 5 will then need to be entered.

In either case, if a code of '11' or '8' is used for Q05b, you are not required to enter a Form 10 (Blood Pressure Form).

Please call me if you have any questions regarding this.

A revised Form 11 will be sent to you in the near future.

Thank you,  
Karen at the DCC
