

Comprehensive Dialysis Study (CDS) Data Archive

The CDS Archive contains the Protocol, Manual of Operations, Forms; and study data. The files are organized into the following directories:

- Forms
- Documentation
- Data
- Data Integrity Check

CDS Forms

This subdirectory contains the following data collection forms in PDF format:

- CDS Block 2000 Brief Food Questionnaire, Due to copyright restrictions, only approved data and/or sample requestors operating under the NIDDK Data Use Certification will be provided with a copy of this form
- CDS Food Frequency Form
- CDS Participant Availability Form
- CDS Participant Information Form – Spanish
- CDS Participant Information Form
- CDS Patient Questionnaire and Human Activity Profile

CDS Documentation

The CDS Documentation directory contains:

- Protocol
- Manual of Operations. The manual comprises three sections and each section comprises several PDF files. The PDF files are organized in subfolders in the “Manual of Operations” subfolder of the Documentation directory.

CDS Data

The CDS data directory contains the following SAS datasets and associated documentation files:

- **Readme file** – a description of the data files in this folder
- **Formats.sas7bdat** – SAS format file for the SAS data files in this folder
- **CDS Patient file** [cds_saf_patient.sas7bdat] - This file contains one record for each of the 1677 patients. A patient record includes a unique identifier (USRDS_ID) used to cross

reference to other USRDS files, demographic data, and a patient category indicator (PAT_CAT_BL) which indicates the patient's baseline survey and lab participation status (quality of life (QOL)-only, QOL and nutrition w / Lab data, QOL and nutrition w/o Lab data, Lab data w/o survey).

- **CDS QOL Baseline file** [cds_saf_qol_baseline.sas7bdat] - This file contains the Baseline QOL survey data from QOL only and QOL/Nutrition participants.
- **CDS Food Baseline file** [cds_saf_food_baseline.sas7bdat] - This file contains the Baseline Nutrition survey data and data generated by "Block Dietary Data System", a database for QOL/Nutrition participants.
- **CDS Lab file** [cds_saf_lab.sas7bdat] - This file contains up to 5 sets of lab data from a subset of QOL/Nutrition participants.
- **CDS Dictionary** [CDS SAF CD files Dictionary.xls] - This file describes the contents of the dataset files, including the formats of the variables.

CDS Data Integrity Check

The CDS Data Integrity Check directory contains a report of an examination of the repository for completeness by statisticians and quality control specialists at the Repository. Datasets were checked for completeness. The published data from the CDS study were compared to values recalculated from the CDS data in the NIDDK repository.
