

6. Renal Scan Series information: **Accession Number:** _____ *mraid*

*For T2 or FISP/FIESTA/BFFE, if the kidney is too large to cover in a single breath-hold, use multiple breath-holds, but as few as possible. Have the first scan cover the posterior aspect of the kidney and then choose the 'shift-mean (starting point in GE)' of the second scan as follows: For example, the 1st shift-mean = -60 mm. **Number of slices in the 1st set =23.** (23-1) x 3 =66 mm. The 2nd shift mean =-60 + 66 = 6mm.
