

Dear Parent(s),

Enclosed is the consent form allowing your child's umbilical cord blood sample to be screened for genetic markers which are associated with an increased risk of developing childhood (Type I) diabetes, as was discussed with you over the phone. Because you gave your consent over the phone, **there is no need to return this form to us; keep this copy for your records.**

If you have any questions after reading this consent, do not hesitate to call DAISY Recruiter at (303) 315-3842. Expect the results of the screening to arrive in the mail in eight to twelve weeks. If your address changes before this time please notify us to prevent any delay in receiving the results.

Thank you for your participation in this very important diabetes research study.

Sincerely,

DAISY Diabetes Study Recruiter
