

To the parents of:
NAME
1234 Anystreet Ave
Anytown, CO 11111

DATE

Dear Parents,

When your baby was born on BIRTHDATE, you consented to participate in a screening study for 'diabetes gene markers' conducted by the University of Colorado School of Medicine. At that time, a sample of your baby's blood was obtained from the umbilical cord and then screened, as was explained to you in the hospital.

This letter is to inform you that we were unable to test your baby's blood due to technical difficulties. In order to do this testing we will need to draw a blood sample. If you are still interested in having this testing done, please contact our study nurse at (####) ###-####.

We apologize for any inconvenience this may have caused you and would like to thank you for your participation in this important diabetes research study.

Sincerely,

Marian Rewers, MD, PhD.

Jill M. Norris, PhD.
