

8/17/2015

Dear DAISY Family,

Thank you for your past participation in the DAISY study. Even though you are not actively participating in DAISY, we are interested in knowing how many past participants have developed type I diabetes or celiac disease. Such information may help us better understand the link between diabetes, celiac disease, and the environment. Please answer the questions attached to this letter and return to us. If any of your contact information has changed recently, please update in the questionnaire. All postage will be paid by DAISY.

If you have any questions about the importance of this follow-up information please call our clinic at 303-724-7622. The participant is always welcome to schedule a one-time follow-up visit to check his/her current antibody status. We will reimburse your one-time visit with the amount of **\$50 dollars**. If, at any time, the participant wishes to rejoin the DAISY study, we will be happy to re-enroll him/her.

On behalf of the DAISY researchers, thank you for helping us to learn more about this serious disease.

A handwritten signature in black ink, appearing to read "Marian Rewers". The signature is fluid and cursive, with the first name "Marian" and last name "Rewers" clearly distinguishable.

Marian Rewers, M.D., Ph.D.  
Professor of Pediatrics  
Principal Investigator, DAISY  
COMIRB No: 92-080
