

ADDITIONAL BLOOD COLLECTION FOR DNA EXTRACTION

Sept. 24, 2008

COMMUNICATION: Email from Michelle Hoffman to all DAISY clinic and lab staff:

Starting immediately, for **ALL** DAISY antibody positive (diabetes antibodies) please draw 40cc at the next visit, regular distribution with the extra 10cc going into a purple top tube for DNA extraction. This purple top does not need to be foil wrapped. Once you draw the extra 10cc please write in comments, Extra DNA sample drawn and the date.

At this time we only need to get this one time for each positive subject. Thanks.

Shell

This reflects decision made during Sept. 23rd, 2008 DAISY meeting where Dr. Rewers requested that we collect additional blood from all DM + subjects for extraction of DNA. This should be the third collection of whole blood for DNA extraction. All DNA extracted from this third collection will remain with the DAISY study.
