

DAISY Very Short Draw Priority

1. In the case that we receive only a very small amount of serum for a subject
2. Aliquot the serum as follows:
 - a. 200ul into the LabID tube
 - b. Then aliquot 200ul into the first Q's tube
 - c. Put the remaining serum up to 1000ul total vol in the LabID tube
 - i. Record the final volume on the clinic visit sheet
 - d. Any remaining serum will be aliquoted into the TG then Q2's tube.
