

*******There are changes to our ANTIBODY TESTS*******

The **ICA512 antibody name** has been changed to **IA-2**. We have also changed how we measure **GAD** and **IA-2**. This new way of measuring has become the standard around the world, and **DAISY** is dedicated to maintaining the highest standards for our participants.

WHAT THIS MEANS FOR YOU: Previously all results were reported in decimal points, now **GAD** and **IA-2** will be reported in whole numbers. Result values will appear different from previous results and the cutoffs between positive and negative are different (see below for new cutoffs). The meaning (Positive/Negative) of these results is still the most important thing to note.

GAD negative is ≤ 20

IA-2 negative is ≤ 5

IAA negative is ≤ 0.01 ****no change****

If you have any questions please call **303-724-7555**.
