

06-06-2012

Dear Ms. SMITH,

The results of your DAISY antibody tests, drawn on 5/9/2012, are as follows:

GAA: 0	Negative	(GAD Autoantibody)
IAA: -0.001	Negative	(Insulin Autoantibody)
IA-2: 0	Negative	(IA-2 Autoantibody)
ZnT8: 0.002	Positive	(ZnT8 Autoantibody)

This is a screening test to determine if antibodies to the pancreas are present. It is important to realize that even though one antibody test is positive, it does not mean you will definitely develop diabetes.

We would like to follow you more closely, and recommend repeating these tests at your child's next clinic visit. Our study nurse, Michelle Hoffman, will be calling you to answer any questions you may have. If she has not contacted you yet, feel free to call her at (303) 724-7555.

Thank you very much for participating in this diabetes research.

Sincerely,

Marian Rewers, MD, PhD

Professor of Pediatrics

Georgeanna Klingensmith, MD
