

date

Dear name,

The results of your DAISY Autoantibody tests, drawn on date, are as follows:

GAA: 0	Negative	(GAD Autoantibody)
IAA -0.001	Negative	(Insulin Autoantibody)
IA-2: 10	Postive	(IA-2 Autoantibody)
ZnT8: 0.002	Negative	(ZnT8 Autoantibody)

This is a screening test to determine if Autoantibodies to the pancreas are present. It is important to realize that even though one Autoantibody test is positive, it does not mean you will definitely develop diabetes.

We would like to continue to follow you more closely, and recommend repeating this test every three to six months. We will be contacting you one month before you are due for your next clinic visit to schedule this appointment. If you have any questions please feel free to contact our study nurse, Michelle Hoffman, at (303) 724-7555.

Thank you very much for participating in this diabetes research.

Sincerely,

Marian Rewers, MD, PhD
Principal Investigator
