

The following questions ask about your child's current intake of specific foods.

On average, how many servings a day does " _____ " eat of foods made with wheat, oats, barley and rye? This includes breads (white and dark), cookies, pies, pasta, cereals, pretzels, and crackers?

(1 slice of bread = 1 serving)

- 1) Rarely or Never
- 2) Less than 1
- 3) 1 - 2 servings/day
- 4) 3 - 5 servings/day
- 5) 6 or more servings/day

On average, how many servings a day does " _____ " eat of corn, rice, or potatoes and foods made of corn, rice and potatoes, such as fries, rice cakes, cereals, breads, cookies, pies, pasta, chips, and crackers?

(1/2 cup of cooked rice = 1 serving)

- 1) Rarely or Never
- 2) Less than 1
- 3) 1 - 2 servings/day
- 4) 3 - 5 servings/day
- 5) 6 or more servings/day

Because the results of one of our laboratory tests can be affected by exposure to cigarette smoke, we need to ask a few questions about your child's current exposure to cigarette smoke.

Does " _____ " mother currently smoke? Yes No

In the home? Yes No

Does " _____ " father currently smoke? Yes No

In the home? Yes No

Is your child exposed to cigarette smoke on a regular basis (Any exposure at least one time a week) from anyone other than the parents? i.e. step-parents, day care providers, grandparents, siblings, friends?

Yes No
