

DCCT Data Set Documentation: Forms 21.1 - 21.6

Form 21: Quarterly Visit

Versions 21.1 - 21.6 - Used through September 1990

Purpose: Collect interim information on physical condition, diabetes management, diabetic complications, and intercurrent events.

Collection Schedule: Baseline and each quarterly visit.

Data Set Name: F021CMB6

Structure: One record per patient per visit completed.

Size: 18137 observations of 377 variables.

Known Anomalies: Instructions to skip certain sections of the form under specific conditions (e.g., the detailed questions regarding ketonuria and hypoglycemia on pages 7-10) were not universally followed during form completion.

Some observations contain internal inconsistencies in the variables on insulin doses collected on pages 4 and 5. In some cases, the total number of units reported does not equal the sum of the individual doses; in others, one or the other block of variables is missing.

Many female patients who missed menstrual periods did not undergo pregnancy tests due to established histories of amenorrhea.

I FORM

DIABETES CONTROL AND COMPLICATIONS TRIAL

Quarterly Visit

This form is to be completed at the randomization visit and each of the scheduled quarterly follow-up clinic visits. For visits occurring yearly post-randomization, complete the Annual Medical History and Physical Examination (DCCT Form 003) in lieu of this form. At the time of the quarterly visit, date will be collected on this form to document modifications of therapy and to update information on the status of patients on deviations from assigned treatment and transfers to inactive status.

All questions on this form refer to the patient's experience since the last completed quarterly, annual or randomization visit. If the form is being completed at the randomization visit, the questions refer to the patient's experience since the baseline Medical History and Physical Examination (DCCT Form 002) was completed.

If in completing this evaluation it is found that the patient has experienced an intercurrent event, complete the Notification of Intercurrent Event Form (DCCT Form 020) and, if applicable, the Notification of Hypoglycemic Intercurrent Event (DCCT Form 063).

Send the completed form to the Coordinating Center in the weekly forms mailing, retaining a copy in the clinic files.
