

ALT Flare Resolution (Pediatric)

Patient ID	ID	-		_	

This information is to be completed by the physician investigator immediately following resolution of an ALT flare. The information is to reflect the opinion of the physician investigator based on information available at the time of resol

SECTION I	· FTIOI	OGY O	F FI ARF

resoluti	on.						
SECTION	ON I: ETIOLOGY OF FLARE						
1.	Estimate date of onset (mm/dd/yy):	FLONSM / FL	ONSD / FLONSY				
2.	Date of diagnosis (mm/dd/yy):	FLDXM / FLDXD / FLDXY					
3.	Date of resolution (mm/dd/yy):	FLRESM / FLRESD / FLRESY					
4.	Did patient develop symptoms of hepatitis B (fatigue, nausea, anorexia, etc.) during the flare?						
	☐ Yes ☐ No ☐ Unknown FL						
5.	Did patient become jaundiced (total bilirubin ≥ 2.5 mg/dL or visible jaundice) during the flare ?						
6.	☐ Yes ☐ No ☐ Unknown FLJAUN Did patient develop any evidence of hepatic decompensation (ascites, encephalopathy, variceal bleeding, INR > 1.5, albumin < 3.0 gm/dL, etc.) during the flare? ☐ Yes ☐ No ☐ Unknown FLHDEC						
7.	Probable etiology of the ALT flare: FLDX if specify required: FLDXS						
	Probable etiology of flare						
	Reactivation of hepatitis B						
	1. Spontaneous						
	2. Upon withdrawal of antivira		('				
	 Associated with immunosup Progression of immunodefice 		py (including DAAs)				
	5. Transition from IT to IA pha						
	Immune clearance of hepatitis B						
	9. Unsuccessful attempt at im	mune clearand	e				
	10. Spontaneous						
	11. Antiviral therapy induced12. Immune reconstitution						
	13. Withdrawal of antiviral thera	apy with flare a	nd seroconversion				
	ALT Flare with no change in HBV D						
	16. No change in HBV DNA						
	Drug-induced liver disease						
	20. Idiosyncratic reaction, spec21. Direct toxic reaction, specification						
	22. Alcohol	i y diug					
	23. Acetaminophen						
	Superimposed liver disease or infection	ction:					
	30. Hepatitis A		40.Other, specify				
	31. Hepatitis D 32. Hepatitis C		41.Unknown 42. Acute HBV				
	33. Hepatitis E		43. HBV related but inadequate information to				
	34. Autoimmune hepatitis		determine a specific etiology				
	35. Other, specify						
SECTION	ON II: CLINICAL DECISIONS						
1.	Clinical decisions made in respons	e to the flare	(check all that apply):				
	☐ Continue to follow, without starting on antiviral therapy CDFOL						
	☐ Continue to follow, already on an	tiviral therapy 🤇	DFOLA				
	☐ Hospitalization CDHOSP						
	☐ Start on antiviral therapy CDAVT Physician investigator initials:PIID						
	☐ List for liver transplant CDLIVT		Date form completed (mm/dd/yyyy): DCM/DCD/DCY				

☐ Other CDOTH, specify ____CDOTHS_
