The testes, scrotum and penis are about the same size and shape as they were when you were a child.	The testes and scrotum are bigger. The skin of the scrotum has changed. The scrotum, the sack holding the testes, has gotten lower. The penis has gotten only a little bigger.	The penis has grown in length. The testes and scrotum have grown and dropped lower than in drawing 2.	The penis has gotten even bigger. It is wider. The glans (the head of the penis) is bigger. The scrotum is darker than before. It is bigger because the testes are bigger.	The penis, scrotum, and testes are the size and shape of an adult man.

**SECTION II:** The drawings below show 5 **different stages of male pubic hair growth**. A boy can pass through each of the 5 stages as shown. Please look at each drawing and read the sentences that match each drawing. Then mark an "X" in the box above the drawing that you think is **closest** to your stage of pubic hair growth. **Do not** look at or select for penis size with this set of drawings. **TANPUB**

There is no pubic hair at all.	There is a little soft, long, lightly-colored hair. Most of the hair is at the base of the penis. This hair may be straight or a little curly.	The hair is darker in this stage. It is more curled. It has spread out and thinly covers a bigger area.	The hair is now as dark, curly, and coarse as that of an adult man. The area that the hair covers is not as big as that of an adult man. The hair has NOT spread out to the legs.	The hair has spread out to the legs. The hair is now like that of an adult man. It covers the same area as that of an adult man.
