

**LABS-1 Form List**

			Time Points			Description
			Pre-Operative (Baseline)	Operative	Post-Operative (30-day post surgery)	
1	Pre-Operative Evaluation	(PO1)	X			Completed prior to surgery
2	Pre-Operative Evaluation Update - LABS1	(PU1)	X			Completed if Pre-Operative Evaluation completed more than 90 days prior to surgery. LABS-2 participants did not complete the PU1. LABS-2 participants completed a series of self-assessment forms prior to surgery that provided updated information.
3	Pre-Operative Update information - LABS2	(PO2)	X			LABS-2 participants completed a series of pre-operative self-assessment forms. Data points from these forms that were used to update PO1 information for analyses have been compiled for this release and apply for those participants who consented to LABS-2 and proceeded to surgery before 1/1/2008. These participants were considered LABS-1 participants as well. Since these data points have been abstracted from various LABS-2 forms, neither a data collection form nor a data dictionary could be provided.
4	Pre-Operative Update SUBSEQUENT SURGERIES ONLY - LABS-2	(PU2)	X			Completed on LABS-2 participants undergoing subsequent bariatric procedure. Only LABS-2 participants whose subsequent procedures were prior to 1/1/2008 are included in this dataset.
5	Operative Evaluation - LABS1	(OP1)		X		Operative form completed for LABS-1 participants.
6	Surgeon's Questionnaire - LABS2	(SQ)		X		Operative form completed for participants who consented to LABS-2 and proceeded to surgery before 1/1/2008. These participants were considered LABS-1 participants as well.
7	Operative Information (Surgery Specific) - LABS2	(OPS)		X		A surgery-specific form, in addition to the general SQ form, was completed for all LABS-2 participants. Some variables on surgery-specific forms match variables on the OP1 form. To create a complete operative dataset, these data points have been compiled for this release and apply for those participants who consented to LABS-2 and proceeded to surgery before 1/1/2008. These participants were considered LABS-1 participants. Since these data points have been abstracted from various LABS-2 forms, neither a data collection form nor a data dictionary could be provided.
8	30-Day Post-Operative Evaluation - LABS1	(POST1)			X	Post-operative form completed for LABS-1 participants.
9	30-Day Post-Operative Evaluation - LABS2	(POST2)			X	Post-operative form completed for participants who consented to LABS-2 and proceeded to surgery before 1/1/2008. These participants were considered LABS-1 participants as well.
10	Post-Op Add'l Events - LABS1	(ADDEV)			X	Completed if additional events could not be recorded on the POST1
11	Site of Leak Form	(LEAK)			X	Completed if POST1 or POST2 listed any post-operative interventions due to suspected anastomotic leak
12	Pathology form - LABS1	(PATHL)		X		Pathology report for liver biopsies obtained during surgery. Only one site provided liver biopsies for LABS-1
13	Mortality Report Form	(MORT)			X	Records the final determination of the Adjudication Committee for participant deaths within 30 days of bariatric surgery
14	Reason for Unconfirmed Intervention Form	(UEVNT)			X	Records the final determination of the Adjudication Committee for unconfirmed events and unplanned anticoagulation treatments within 30 days of surgery
15	Surgeon's Experience Form	(SEF)				Completed once by each LABS-certified surgeon
