

Tables and Corresponding datasets for Teckman et al., “Baseline Analysis of a Young Alpha-1-AT Deficiency Liver Disease Cohort Reveals Frequent Portal Hypertension”, J Pediatr Gastroenterol Nutr. 2015 July ; 61(1): 94–101.

Table 1: For Native Liver Cohort vs. Post-Transplant Cohort, use categorical variable pretx

Table 2: For Mild versus Severe liver disease, use categorical variable liver_disease

Table 3: For No PHT versus PHT, use categorical variable pht

Table 4: Compare pht_us to pht

Figure 1: Use variable ihx2b02_age, by categorical variable liver_disease

Figure 2: Use variables myctxsbjid, pht, ggtp, and ast (sorted by variable pht) for a boxplot in R

Data Structure:

One observation per participant. Data are derived from two studies: LOGIC and PROBE. Thus, CRFs for both studies are provided. The column “Source Form” indicates which study (CRFs) were the source for the indicated variables. The variables are from the LOGIC study, unless denoted by dataP003. prefix which indicates that the variables are from the PROBE study.

Variable Name	Description	Source Form	Derivation	Range (continuous)/Response Options (categorical)
myctxsbjid	De-Identified Subject ID.			1 to 733
Group	Eligibility group	ELG1, ELG2, ELG3	1=all subjects in ELG1 dataset, 2=all subjects in ELG2 dataset, 3=all subjects in ELG3dataset,	1, 2, 3
Age	Age	ELG1, ELG2, ELG3	Derived from consent date – DOB : ELG1 (elg1b07dt - elg1b01dt), ELG2 (elg2b07dt - elg2b01dt), ELG3 (elg3b07dt - elg3b01dt)	0.0-24.9
ihx2b01_age	Age – 1 st symptoms noticed	ihx2, ELG1, ELG2, ELG3	Derived from myihx2b01dt – dob: ihx2 (myihx2b01dt), ELG1 (elg1b01dt), ELG2 (elg2b01dt), ELG3 (elg3b01dt)	0.0-20.2

Variable Name	Description	Source Form	Derivation	Range (continuous)/Response Options (categorical)
ihx2b02_age	Age – Liver disease diagnosed	ihx2, ELG1, ELG2, ELG3	Derived from myihx2b02dt – dob: ihx2 (myihx2b02dt), ELG1 (elg1b01dt), ELG2 (elg2b01dt), ELG3 (elg3b01dt)	0.0-20.2
dmgab02	Gender	dataP003.dma, dmg2, dmg3	Derived from: dataP003.dma (dmab02mf), DMG2A/DMG3A (dmg3ab02),	1=Male, 2=Female
dmgab03	Ethnicity	dataP003.dma, dmg2a, dmg3a	Derived from: dataP003.dma (dmab03hl), DMG2A/DMG3A (dmg2ab03) Modifications: For dataP003.dma if dmab03hl= '1' then dmgab03 = '2'; if dmab03hl = '2' then dmgab03 = '1'; if dmab03hl = '3' then dmgab03 = '66'; if dmab03hl = '9' then dmgab03 = '9'; Overall: dmgab03 in ('55','77') then dmgab03 = '66';	1 = Hispanic, 2 = Non-hispanic, 66 = Not reported
