

**NIDDK Liver Transplantation Database
MANUAL OF OPERATIONS (MOOP) DEFINITION**

FORM: END OF STUDY FORMS

Page 1 of 1

- ES - Adult End of Study assessment for post-transplant patients who are not required to have a full protocol follow-up evaluation.
- EA - Adult End of Study assessment for adult pre-transplant patients and post-transplant patients who are required to have a full protocol follow-up evaluation.
- EP - Pediatric End of Study assessment for pediatric pre-transplant patients and post-transplant patients who are required to have a full protocol follow-up evaluation.

Purpose: An End of Study form is to be completed at the close-out of the LTD data collection phase for all pre- and post-transplant patients. The End of Study form to be completed for post-transplant patients is dependent upon the time of the patients' annual follow-up evaluation.

Person(s) Responsible: Patient, LTD Clinical Coordinator.

Source(s) of Information: Patient, family member.

General Instructions: End of Study forms are to be mailed to the patients for completion or are to be completed by patients at scheduled follow-up visits at the LTD clinical center. The EA form is to be mailed to all adult pre-transplant patients. The EP form is to be mailed to all pediatric pre-transplant patients. The ES form is to be mailed to post-transplant patients who are not required to have a full follow-up evaluation. The EA and EP are to be completed by adult and pediatric patients at the time of their full follow-up evaluation.
