Pelvic Exam: Male

MAPP Clinician completes at Screening Week 0 and at Month 18 Clinic Contact.

Smile at patient, and then say the following: "I will be doing a physical examination to determine if there is pain to touch at various points on your body. The exam will include both external touch on your abdomen and perineal region and internal touch of the pelvic muscles. You will feel slight pressure at each site, please let me know if any site that I touch is <u>painful</u>." Exam will be performed with patient <u>standing</u>, with the upper body bending over the edge of the table (the prostate exam position), <u>prior to the prostate palpation exam</u>.

1.	Suprapubic area pain?	\square_0 No	□ ₁ Yes
2.	Perineal body pain? (6:00)	\square_0 No	□ ₁ Yes
3.	Posterior levator muscle (2:00)	□ ₀ No	□ ₁ Yes
4.	Posterior levator muscle (10:00)	\square_0 No	□ ₁ Yes
5.	Obturator internus muscle (9:00)	\square_0 No	□ ₁ Yes
