

## **The PAN CIT Study Data Archive**

The CIT consortium conducted a total of 9 studies across North America (CIT02 through CIT08) and the Nordic region (CIT01). CIT08 was a long-term follow-up study for interested participants at the North American sites. The target population is individuals with type 1 diabetes, normal kidney function, and intractable hypoglycemia. All studies treated participants with up to 3 separate infusions of islets.

Non-Study Specific CIT data are available for request.

Note that the Data\_Dictionary\_-\_Manufacturing\_Unused\_Lots\_U.xlsx file contains the data dictionary for all of the dataset included in this data package.

Archive files are organized into the following directory:

- Data

### **Data**

The PAN-CIT data directory contains the following dataset:

- manufacturingunusedlotsv2.txt
