Stage 1

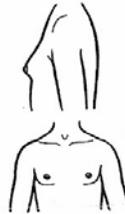

- The nipple is raised a little.
- The rest of the breast is still flat.

Stage 2

- The breast is a little larger and the nipple is raised more than in Stage 1.
- The darker skin area of the nipple is larger than in Stage 1.

Stage 3

- The darker skin area around the nipple and the breast are both larger than Stage 2.
- The darker skin area around the nipple does not stick out away from the breast.

Stage 4

- The darker skin area around the nipple and the nipple stick up above the shape of the breast.

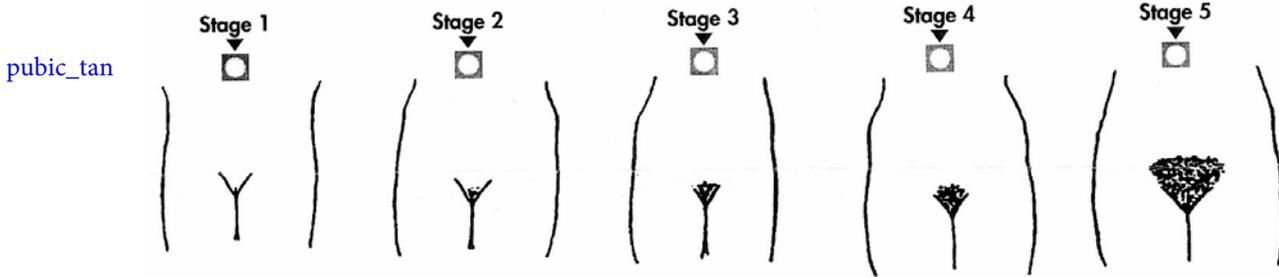

Stage 5

- Only the nipple sticks out in this stage.
- The darker skin area around the nipple has moved back down to the breast.

Public reporting burden of this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
