

Required T1DGC Acknowledgement Statement

All presentations that report findings obtained through the use of T1DGC resources must acknowledge the T1DGC as the source of those resources and the agencies that supported their development. For manuscripts, the following statement should appear within the acknowledgments section:

“This research was performed under the auspices of the Type 1 Diabetes Genetics Consortium, a collaborative clinical study sponsored by the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), National Institute of Allergy and Infectious Diseases (NIAID), National Human Genome Research Institute (NHGRI), National Institute of Child Health and Human Development (NICHD), and Juvenile Diabetes Research Foundation International (JDRF).”

Oral presentations and posters do not have to adhere to this exact language, but must acknowledge the T1DGC and the listed funding agencies.

In addition, genotyping facilities should be acknowledged accordingly. For each genotyping project, the proposed language is provided.

CIDR Microsatellite or 6K Genome Scan

Genotyping was performed by the Center for Inherited Disease Research (CIDR) which is fully funded through a federal contract (N01-HG-65403) from the National Institutes of Health to the Johns Hopkins University (Baltimore, MD, USA).

MHC Fine Mapping

Genotyping was performed by the Sanger Institute (Hinxton, UK) which is supported by The Wellcome Trust.

Rapid Response

Genotyping was performed by The Broad Institute Center for Genotyping and Analysis (Cambridge, MA, USA) which is supported by grant U54 RR020278 from the National Center for Research Resources.

Rapid Response 2

Genotyping was performed by The Broad Institute Center for Genotyping and Analysis (Cambridge, MA, USA) which is supported by grant U54 RR020278 from the National Center for Research Resources and the Sanger Institute (Hinxton, UK) which is supported by The Wellcome Trust.

TaqMan

Genotyping was performed by the Diabetes and Inflammation Laboratory at the University of Cambridge (Cambridge, UK) which is supported by The Juvenile Diabetes Research Foundation and The Wellcome Trust.
