Treatment Options for Type 2 Diabetes in Adolescents & Youth Long Term Follow-Up (TODAY2)

The TODAY2 study was a longitudinal follow-up study to the TODAY (Treatment Options for Type 2 Diabetes in Adolescents and Youth) study that continued the care and observation of the TODAY cohort participants beyond the end of the TODAY intervention trial. The TODAY2 study had two phases: 1) Transition of TODAY participants to non-blinded, non-randomized standard diabetes care and management with monitoring and follow-up for up to 24 months, and 2) Long-term longitudinal follow-up of the TODAY cohort based on findings from TODAY.

The TODAY2 Data Archive contains related descriptive documentation, data collection forms, study data, and a dataset integrity check for this study.

Archive files are organized into the following directories:
- Data
- Documents
- Dataset Integrity Check (DSIC)
- Forms
